Subject: Thank You

Samantha,

Thank you for taking the time to meet with us earlier this week, especially because you were called in during the meeting.

We are very happy with the overall direction of EPA and very impressed with EPA's understanding of our issues and the steps you have already taken to help resolve our concerns.

Our main concern was explaining how unique the specialty chemical industry is and precisely why we need a seat at the table. We are very excited to participate in groups like the Sector Strategy group and be partners with EPA.

Again, thank you for a terrific meeting. I'm personally very much looking forward to working with EPA in this new environment.

Regards,

Robby
