

intended to provide a substantial increase in overall protection but is considered justifiable and warranted to prevent a decrease in the level of protection considered available under current regulations. In addition, the rule is considered to save resources in bankruptcy circumstances. The Commission proposes to promulgate the proposed rule for the following reasons: (1) There is some, albeit small, potential for reduction in public and occupational exposure; (2) the action required by this rule is administrative, resulting in no installation, downtime, or construction costs and no effect on plant or operational complexity; (3) the burden on industry and NRC is minimal, and in fact the proposed action would probably result in a net reduction in NRC resource expenditures; and (4) the proposed action is justified for non-power reactor and materials facilities based on an assessment of the costs and benefits in the Regulatory Analysis (Section 8.0), and imposing it for reactor plants also would provide for consistency in the regulations.
