

Dear Customer:

As we have previously notified you by way of correspondence since early 1970, and again upon receipt of your order, the material described on the attached invoice contains polychlorinated biphenyls (PCB). Polychlorinated biphenyls are highly stable chemical compounds and are not ^{easily} biodegradable. Therefore, when placed in the environment they may be considered contaminants and may adversely affect some species of animal and marine life.

You must take every precaution to prevent any entry of polychlorinated biphenyls into the environment through spills, usage, leakage, disposal, vaporization or otherwise.

This material should not be used by you or your customer in equipment, packaging materials or products involved in the processing, handling, or storage of food, food related products, animal feeds, food wrapping or container materials, potable waters or pharmaceuticals.

Very truly yours,

MONS 094835
