

January 15, 1972

Dear sir:

Recently, my friends and I have become quite concerned about the lead content in our pottery. Upon reading a recent article in Ceramic Industry Magazine we have decided to write to you in the hopes you might send us copies of your publication Lead Glazes for Dinnerware and any other material which might aid us in developing a rapid and inexpensive lead test for our pottery. We will gladly purchase this material in order to relieve our minds concerning the "lead menace". Thank you for your attention in this matter. Please forward copies of the material to the following addresses in addition to the one above:

Pat Burgess
RD 2 Kingsford Cottage
Princeton, New Jersey

Bruce Poling
3A Ozark Terrace
Rolla, Mo. 65401

Sincerely

John B. Wood
