Re: Irradiated Plastic Pipe Proposal

Dear Mr. Kelly:

We have had no word from you since your letter of February 15th past and are wondering how and where we stand in the matter. Is there anything you can tell us at this time? Anything you can pass along will be appreciated.

In the meantime we understand that the allowed C.N.R.S. patent on mutual irradiation will be issued very shortly now in this country (if it is not already and just recently out). This is Item (3) in the Appendix of the proposal sent with my January 20, 1966 letter to you. We will let you know its exact identity as soon as we have the particulars on this patent.

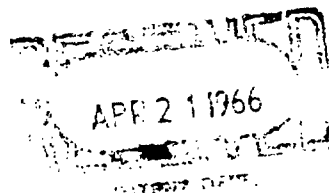

Sincerely,

THE DOW CHEMICAL COMPANY
