Cincinnati, Ohio.

Dear Doctor:

In order to approve reports of certain occupational diseases concerning the diagnosis of which controversy may arise, and often does arise, we are asking for additional facts. This particularly applies to Lead Poisoning.

We have accordingly compiled for Lead Poisoning the enclosed 2-paged questionnaire entitled "Supplementary Evidence in the Diagnosis of Lead Poisoning", asking the reporting physician to fill out the different items so far as he has evidence and to return one copy of same to this office as a supplemental statement to be affixed to the original Certificate of Industrial or Occupational Disease. All matters concerning compensation, medical and other fees, should be taken up with the Commission directly since this Department is not concerned with compensation of occupational diseases.

The following named patient(s) has(have) been reported to this office by you for which this information is desired:

Date Report

August 15, 1939

Cincinnati, Ohio.

Additional questionnaire blanks and "Comments on the Diagnosis of Lead Poisoning" are available upon request.

Thanking you in advance for your early response,

Yours very truly

R. H. Markwith, M.D.,
Director of Health.
