	(CALLAHAN, FRANCIS)	7331	23140		V.B.M. OPERATOR NO X-RAY ON FILE AT WESTINGHOUSE OUTSIDE DOCTOR 10-79

Fekiner

16 - 372 = 4.3%

28002934

Annual medical surveilance on asbestos currently includes laggers, pipefitters, babbitters and maintenance employees who could be assigned to remove asbestos pipe insulation.

Recently, we added 113 employes, as a precautionary measure, in Combustion Turbine Division who occasionally work with "Garlock" gaskets.

TOTAL EMPLOYEES SURVEYED

372

M. P. Whittington, Manager
Safety & Health Department
Lester Site

28002935

First & Mail only

April 3, 1980

If retirees were to be surveyed, following are some logistic problems:

1. Who would be included?
2. Where do they now live? Gateway has current address, but not by location.
3. Would we attempt to notify those living far away?
4. A significant percentage of people this age group will have a decreased in lung function, from age alone. Could we possibly be held responsible? It may be difficult to categorize cause.
5. To further differentiate, cause and effect, where lung disfunctions exist will require special examinations that we are not able to perform in-plant. Would require outside hospital testing, such as diffusion tests (nitrogen).
6. If positive results were indicated, what would or could be done?

Miscellaneous Information

1. At Lester Benefits Office, we have 1,700+ retirement folders, which only reflect occupation at retirement.
2. Inactive employee folder for 80 & 79 are kept at Lester Employment Department. Current estimate total - 800.
3. 1978, 77, 76 folders at local Delaware County storage and previous five years at Mine Storage.
4. Don Jordon estimates 80 - 85% of our retired employes remain in greater Philadelphia area and adjacent shore areas.

SOME THOUGHTS ON MEETING OF 4/8/80

1. A DISCHARGE EXAM ON THOSE LEAVING THIS PLANT HAS MERIT

a. IN A SENSE WE ACCOMPLISH THIS WITH OUR YEARLY EXAMS ON ASBESTOS CONTACTS

2. TO EXAMINE RETIREES OR THOSE WHO HAVE LEFT THIS PLANT PRESENTS SOME PROBLEMS

a. CAN WE LOCATE THEM?

b. A SIGNIFICANT PERCENTAGE OF PEOPLE IN THIS AGE GROUP HAVE A DECREASE IN LUNG FUNCTION FROM AGE ALONE. WILL WE BE RESPONSIBLE? IT MAY BE DIFFICULT TO CATEGORICL CAUSE.

c. SINCE KEEPING ON-GOING EXAMS

28002937

WITH OUR EMPLOYEES HAS INCREASED) THE DEMAND OF OUR PERSONNEL'S TIME. NOT TO MENTION BRINGING IN EX-EMPLOYEES WE ARE FACED WITH ADDING RATHER THAN SUBTRACTING PERSONNEL THIS YEAR.

D. TO FURTHER DIFFERENTIATE CAUSE AND EFFECT WHERE LUNG DYSFUNCTION EXISTS WILL REQUIRE SPECIAL EXAMS THAT WE ARE UNABLE TO PERFORM IN-PLANT. WOULD HAVE TO USE HOSPITAL TESTING. SUCH AS DIFFUSION TESTS (NITROGEN)

TELEGRAPH ADDRESS
WUX LESTER, PA

Dear Dr.

Enclosed is a copy of an x-ray report of your patient Mr.

These x-rays were done as part of a screening service at our plant.

The content of the report may be of significence in helping manage your patient or indicate that studies may be required.

Sincerely,

J.W. Seedor M.D.
Medical Director

JWS/hb

PLEASE ACKNOWLEDGE RECEIPT OF REPORT
