Mr Asti

We received very good reports of the Vinyl Chloride Safety Association, and understand you are President, from two sources in recent weeks. Second largest producer of PVC in the UK, BP Chemicals International is interested in becoming identified with the Association.

Could you possibly send me information on the aims of VCSA and its conditions of membership? Safe handling of chemicals such as VCM received much attention in your company and exchange of views with other firms is actively promoted.

Yours sincerely

IAIN STEEL
Production Manager
BP Chemicals International Ltd
