STANDARDS COMMITTEE MEETING

3/19/82 at Newark

It was agreed that the procedure adopted for Permanent Standards and Sampling Lot Acceptance instituted earlier this year has been effective. J. F. Kane has issued an Action Code List incorporating changes. A summary of standards evaluated by Technical Service show that 3 have been received during 1982 with 3 being evaluated and 4 inactive. We expect to receive ten additional candidates during the 2nd quarter.

Roy Pancoast indicated that because of the change from micropulverizer to the Bauer Mill, new standards for Krolor® Medium Yellows (KY-787-D, KY-795-D and KY-907-D) would not be available until the end of the 2nd quarter. It was pointed out that the Kesternich Cabinet performance of these Bauer Milled materials should be better than current quality based on Newark tests. Roy also provided a list of Shipping Standards used by Newark showing the year of adoption. Inventories of each will be supplied by the next meeting (April 16, at Newport).

-2-

March 31, 1982

Newark will also provide, by April 10th, the list of shipping limits used in releasing production lots. You should use this as a basis for establishing an up-dated list of shipping limits recommended for use by Newark. Roy Pancoast has provided shipping limits data for Y-469-D, Y-433-D, Y-434-D, and Y-758-D as examples of data to be supplied.
