DWC

TO: ALL PLANT PHYSICIANS *DWC* *file asbestos*

Remington Arms Company physicians attended a meeting in the fall of 1980 in Wilmington, conducted by Du Pont's Medical Division on the subject of asbestos-related x-ray abnormalities. At the conclusion of the meeting all physicians were requested to begin a detailed program which included a review of the x-rays of all personnel who have had a potential for asbestos exposure who are over 40 years of age and have 10 years of service. Further, all plant medical departments were asked to report to Dr. Burford Culpepper, Du Pont Assistant Medical Director, by no later than March 31, 1981, the results of your review.

This letter is to remind you to complete your review and report the results to Dr. Culpepper. Please send me a copy of the report. I have included a copy of Dr. Bruce Karrh's letter of October 27, 1980 on the subject.
