Subject: CORPORATE SAFETY PROGRAM

Enclosed is the Corporate Safety Program for J-M Manufacturing Company, Inc. and J-M A/C Pipe Corporation. Please peruse it and then let your plant employees read through it.

The occupational safety and health of J-M employees is our prime concern, and should be treated as an integral part of our jobs. It is the policy of this Company to provide safe and healthful working conditions/operating practices that will ensure a safe work environment for employees.

In order for this safety program to become more effective, every J-M employee should take a serious interest in safety. It must be pointed out that safety is the responsibility of every executive, every manager, every supervisor, and every worker within each one's scope of action. By working together, we can maintain a safe working environment for all J-M employees.

Dr. E. E. Wang
Manager, Corporate Environmental Control
