**Subject:** Fwd: National Geographic inquiry re: vehicle fuel efficiency

Good afternoon EPA - are you able to assist with the request detailed below, since Robert is out of the office?

Thank you,  
Kelsey

Hi Robert,

Are you thinking you might have an answer available today or no? I just want to update my team.

Thank you very much,  
Kelsey

Hi Robert,

Thank you for your quick response. We are hoping to get a response by COB tomorrow, so we can meet our editorial deadline, though the piece won't public for a couple weeks. We don't need a laundry list of all the car makes, we just want to know what general types were included in the figure. For instance, were SUVs and trucks included along with cars/sedans?

Many thanks,  
Kelsey

Dear Robert,

I hope your 2018 is off to a great start!

I have a quick question for you regarding an infographic I'm working on about fuel efficiency for National Geographic. I used the EPA data for the Car (tab "Section 9"), see attached or in this link : <https://www.epa.gov/fuel-economy-trends/download-co2-and-fuel-economy-trends-report-1975-2016>

It doesn't specify the type of car, but it seems, for the rest of the file, an average of the cars in the market for every year. Is that the case with this stat? We want to be able to indicate what kind of cars it includes (i.e. cars, trucks, market average).

Many thanks in advance for your help and I look forward to hearing back from you soon.

Kind regards,  
Kelsey
