Subject: Class B Firefighting Foam Containing Persistent Organic Pollutants (POPs) - PFOA

CAUTION: This email originated from outside the organisation. Do not click links or open attachments unless you recognise the sender and know the content is safe.

Good afternoon [REDACTED]

Following your email on the above topic, I have checked with our site safety team and am pleased to confirm as follows;

Do you maintain any stocks of firefighting foam on site? – No, only water and CO2 extinguishers are on the site.

Would any stocks of firefighting foam be brought onto site in the event of an incident? – Yes. However, we have checked with the fire brigade and the material they would bring on-site is Alcoseal 3/6. From a quick Google search on this material, it does not list PFOA as a component of the mixture.

If you require any further information, please do not hesitate to contact me.

Kind regards

[REDACTED]

E-mail [REDACTED]@dupont.com

The majority of the former DuPont Mobility & Materials business* has been acquired by Celanese Corporation. It is no longer part of DuPont and is now owned by Celanese Corporation. Accordingly, the content of this email is not authorized by or known to DuPont. (Former DuPont employees in the Mobility & Materials business still have access to their dupont.com email accounts for a transition period.)

*The portion of the DuPont Mobility & Materials business now owned by Celanese excludes certain Advanced Solutions (Adhesives, Brake Fluids, and Tedlar® films) and Performance Resins (Delrin® acetal resins and Multibase™ thermoplastic additives) businesses. These excluded businesses remain with DuPont.
