

Fresh fish (continued)
walk-in coolers, 626
cold storage type, 628
portable type, 628
water chilling equipment, 627, 630
coolers, 630

Friction loss
copper tube, 811
elbows, 92, 97, 98, 121, 122, 124, 144
fittings, 72, 91, 733, 814
hot water piping, 121, 122
industrial exhaust, 256
pipe, fairly rough, 813
pipe, rough, 813
pipes, 91, 92, 93, 95, 97, 98, 121, 122
124, 144, 791, 792, 811-813
refrigerant piping, 7, 727
snow melting system, 638

Frozen fishery products, 435

Frozen foods

bacterial counts, 411-413
accuracy of, 412
coliform counts, 412
microscope counts, 412
plate counts, 412, 413
suggested counts, 412
bacterial standards, 413
bacteriology of, 411
freezing and storing, 411
health aspects, 413, 414
diseases, 413
microbiology of, 411-416
plant sanitation, 414-415
chlorination, 414
herpers, 414
plant construction, 414
waste elimination, 414

Frozen fruit juice concentrates, 427

apple juice, 432
berry juices, 433
blended grapefruit and orange juice, 432
concentration, 428
distribution, 428
packing, 428
431
storing, 428
quality control, 428
concentration methods, 428
direct refrigeration contact, 429
freezing and mechanical separation, 428
indirect refrigeration contact, 429
plate evaporator, 430
thermo-compression, 430
vacuum drying to powder, 428
vacuum evaporation, 428
vapor recompression, 430
grape juice, 432
grapefruit juice, 431
orange juice, 430
pineapple juice, 431
process and quality control, 427
grading, 427
heat treatment, 427
juice extraction, 427
selecting, 427
storage, 427
washing, 427
tangerine juice, 431
packaging, 421
quality grading, 420
washing, 419, 420

Frozen fruit juice concentrates (continued)

quality control, 422
grading, 422
organoleptic evaluation, 422
sanitation, 422
raw material problems, 417, 418
contamination, 418
harvesting equipment, 417, 418
harvesting methods, 417, 418
insect control, 418
maturity, 417
precooling methods, 418
product handling, 418
suitability for freezing, 417
storage of, 422
storage time, 422
temperature, 422

Frozen fruits and vegetables, 417-426

basic principles, 418, 419
fruits, 419
vegetables, 418, 419
dehydration, 422-426
advantages of, 422, 425
air humidity control, 424
dehydration, 422, 424
enzyme inactivation, 423
freezing and packaging, 424
raw material preparation, 423
drying procedures, equipment, 424-426
belt-rough dryers, 424, 425
static bed drying, 424
freezing methods, 421, 422
enthalpies involved, 421, 422
immersion freezing, 421
loose freezing, 421
plate freezing, 421
processing operations, 419-421
blanching, 420
conveying, 420, 421
dry cleaning, 419
inspection, 421

Frozen meat products, 445-452

age for freezing, 447-448
changes during storage, 449-450
enzymatic, 450
fat, 449
meat pigments, 449
nutritive values, 450
freezing temperatures, 451
effect on flavor, 451
meat color, 451
quality, 451
tenderness, 451
structure, 451
packaging, 447, 449
desiccation, 447, 449
ideal material, 447
moisture loss, 447, 449
sanitation, 446, 447
storage life, 448, 449
effect on quality, 448
for various meats, 448
ice sublimation, 449
palatability, 448
storage temperatures, 448, 449
thawing, 451-453
drip loss, 451
nutrient loss, 452
types of, 445, 446
fresh meats, 445
meat pot pies, 446
precooked dinners, 446
precooked meats, 446

Frozen poultry products, 453 (see poultry products, frozen)

G

General commercial refrigeration, 637-

644
miscellaneous, 642, 644
back bar, 642
beverage coolers, 642
candy cases, 642, 643
ice cream cabinets, 643
