Re: 317-41-399 [REDACTED] vs. Johnson Bronze Co.

Dear Doctor Kehoe:

In accordance with my conversation with you of Saturday, I am enclosing herewith my complete file in which I would be glad to have you review and give me your opinion as to the possibilities of successfully defending the claim for death caused by lead poisoning.

I would also like to have you, when writing me, make any suggestions that you may have to offer relative to further preparation for the defense of this case, as the file in one which I inherited, and I am of the opinion that the evidence is not in the best of shape to defend. Therefore, may we have your suggestions for the preparations for defense and particularly such information as you think is pertinent to the further review of this file by yourself after we have followed your suggestions for re-investigation?

As you were informed, we are having a serious run of lead poisoning cases at this plant, and it was my purpose to avail myself of the privilege you so generously extended to me to discuss the prevention and treatment of these cases this week, but by reason of changes in personnel in our office, I have been and will be unable to leave before next week, and will then make such arrangements as may best suit your convenience.

I will be obliged to you for the return of this file together with your report, at your earliest convenience, all of which accept my best thanks.

Very truly yours,

ROBERT F. COLEMAN, INC.
