Surgical Pathology Section

S74-2585

(Gross description, histologic examination and diagnoses)

Gross:

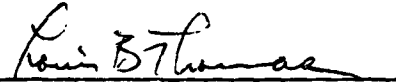

The specimen consists of two slides bearing label of Kentucky Baptist Hospital, Louisville, Kentucky, the accession number S-70-5129 and the patient's name, Meyer. Also submitted are two corresponding paraffin blocks.

Microscopic:

Sections of the bronchus (and cell blocks of bronchial aspirate) show a poorly differentiated squamous cell carcinoma of the bronchus. Some of the tumor cells are large with pale cytoplasm, others exhibit maturation to spindle shape parakeratotic cells.

Diagnosis:

1. Poorly differentiated squamous cell carcinoma, bronchus.

Louis B. Thomas, M.D.
