Superior Combustion Industries, Inc.
801 Broad Street
Ebensburg, Pennsylvania 18049

Attention: Mr. Maurice Ott
Industrial Engineer

Gentlemen:

On November 30 and December 2, 1970, at your request, an investigation to evaluate alleged employees' exposures to organic vapors at spray painting and welding operations was conducted in your plant by Mr. Kenneth G. Knauss, industrial hygienist.

As a result of this investigation, the following recommendations are made:

1. Continue with your plans to install an exhaust ventilated booth at the airless spray painting operation.
2. Continue to provide spray painters with respirators approved by the United States Bureau of Mines for protection against organic vapors and dispersoids.
3. Establish a respirator maintenance program in accordance with Section 43, Article 432.

Enclosed are pertinent Hygienic Information Guides and Chapter 4, Article 432, Regulations Establishing Threshold Limits in Places of Employment, Commonwealth of Pennsylvania.

If you have any questions concerning this investigation, please let us know.

Sincerely,

Frank G. Sents, Jr.,
Regional Industrial Hygienist
Division of Occupational Health

Enclosures

Concerning No. 3, respirator maintenance is on an individual basis and an adequate supply of filters and parts is available.
