Package Material Specifications

ASBESTOS WARNING LABEL
(CLUTCH PARTS & BRAKE LININGS) No. L-1517

L-1517 WARNING LABEL

Usage: For use as a warning label on all unit cartons containing clutch plates, brake linings or components containing asbestos.

Size: 2 1/2" x 2 1/2" 8 point type size
1" x 2 1/2" (optional size)

Material: 60# white label stock

Adhesive: Permanent pressure sensitive

Imprinting: Black ink

Placement: Major or minor panel. It is permissible to have the corrugated cartons preprinted with informational warning copy of the L-1517 label. A photo polymer plate is required for clarity of printing on corrugated carton. 10 point upper case type size is required for preprinted cartons.

DANGER
CONTAINS ASBESTOS FIBERS
AVOID CREATING DUST
CANCER AND LUNG DISEASE HAZARD

Do not inhale dust from brakes, clutches or associated components. Inhalation of asbestos fibers may cause cancer or asbestosis. Compressed air or brushes must not be used to clean brakes, brake drums, clutches or associated components. A high-efficiency vacuum cleaner should be used to carefully remove dust. Adherent dust should be removed with a damp rag. Wear high-efficiency cartridge or airline respirator if preceding work practices cannot be used. Dust and any rag used to remove it should be enclosed for disposal within a sealed impermeable bag bearing this label. Use asbestos-free replacement parts when available.

L-1517

NOTE: This specification combines the L1516 with the L1517 warning label; the verbiage on these labels is identical.
8/26/89 - Combined the L1516 & L1517 labels, added optional size & note (DVB)
5/18/87 - Corrected spelling (asbestosis)
4/29/87 - Revised Caution Label (BRW)
