**FINISHED
PRODUCT**

Johns-Manville carries on the entire manufacturing process of asbestos. Mines in Arizona and Canada, thirteen factories located strategically across the continent and branch offices in all large cities cooperate in the supreme idea of service.

In a hundred ways Johns-Manville products contribute to the comfort of modern life and to the efficiency of industrial establishments. There are Johns-Manville Asbestos Shingles, automobile brake linings and Improved Asbestocel heater pipe and boiler insulations. Besides these, Johns-Manville makes scores of items ranging from asbestos curtains that protect theatre audiences to the packings, insulations and cements which make it possible to heat large buildings, and to operate great power plants.

— A S B E S T O S —

Chug! Chug! Chug!

Perhaps the Noise Commission got after the noisy motor boats which disturb the peace and quiet (?) of many lake resorts.

At any rate, J. E. Banfield, builder of Banfield Sea Skiffs, is now using insulating board to line the engine box with the idea of quieting the roar of the powerful motors used in his famous boats.

The ever increasing popularity of the motor boat for summer vacationers, indicates a large market for asbestos materials which are or might be used by boat builders.

Pulmonary Asbestosis.

Some attention is being given by the U. S. Bureau of Labor Statistics of the Department of Labor, to Pulmonary Asbestosis, a disease resulting from exposure to asbestos dust. The Bureau urges the establishment of efficient exhaust systems and the introduction of other safety methods.

This disease has been noted in England, and much has been written concerning it but this is the first time, to our knowledge, that it has been officially discussed in this country.

The statement of the Bureau of Labor Statistics refers to an article published in the Bulletin of Hygiene, London, in December, giving the results of a study of the clinical and radiological record of 15 cases of pulmonary asbestosis occurring among workers in an asbestos factory.

It is said that the asbestos dust causes a pulmonary fibrosis, attacking the bases of the lungs, and, like silicosis, it is frequently complicated by tuberculosis.

Men do not trip over mountains; they trip over mole-hills.
