Subject: EPEE 2024 Manifesto: A decarbonised Europe: A thriving industry

Dear Commissioner Hoekstra, dear all,

I trust this email finds you well and I am delighted to share with you (see attached) EPEE's 2024 Manifesto, which we very much hope you will consider not only considering current policy making but, in particular, for the next mandate of the future European Commission.

The European Partnership for Energy and the Environment (EPEE) represents the refrigeration, air-conditioning, and heat pump industry (RACHP) in Europe. With over 50 member companies, national and international associations in 22 countries, we represent over 200,000 direct jobs and millions of indirect jobs across Europe. Our members have 100+ manufacturing sites and R&D facilities across the EU. EPEE over the years has built a strong rapport with DG GROW and we look forward to our on-going relationship for which we thank you.

We congratulate DG GROW on its support to the competitiveness, growth and resilience of the EU economy while helping in the decarbonization of European industry, but we wish to impress that there is an urgency to continue this path after the European Parliament elections in June and with the new Commission.

Thank you for your kind consideration, and we would be very happy to provide further details with a in person or online meeting after the Easter holidays.

Kind regards,

[REDACTED]
