SUBJECT : MONSANTO PCB TANKCAR MONX8601 LEAKING AT BINGHAMTON, NY

REFERENCE : 4/20/77

TO :

G. F. Barton	R. C. Isham
F. S. Bonham	A. E. Leisy
H. N. Brandstetter	E. T. Mollica
V. Brawley	R. A. Pohl
W. C. Engman	R. A. Stohr
W. J. Hoerr	D. Wood/J. A. Alley

The transfer of PCB from the leaker was completed about noon.

The net weight of the "new" car was 94,600 lbs. versus 95,300 for the net weight we shipped. However, the tare weight of MONX8601 (the leaker) also was 700 lbs. short by the Binghamton scales. It appears that at the most a gallon was lost.

Bil Crabtree reports that the leaker is completely dry and it appeared that leak probably started in the yard as there was no evidence of spray on the car. MONX8601 has been "bad ordered" due to brakes and will be returned in the next couple of days after the repair.

The car weights, etc., was reported to Mr. Elliott of EPA and Mr. Pagano of the New York State Office.

No further action is planned.
