Attention: Mr. George Turner

Gentlemen:

We are enclosing herewith Drawings #39-73-1, 39-73-2 for the Rock Dryer Dust Collecting System ordered on your #G-05071.

Also enclosed is a sepia of Dwg. #7309-1 which Earl Harvey made on his own. He felt it would possibly assist in obtaining approval since it condenses all the pertinent information required by the State.

For your approval we are also furnishing a certified print of the Flex-Kleen Collector. Note that they limit the operating temperature to 225°.

Delivery of the collector is scheduled for May 5th, at which time we will be prepared to expedite installation.

In regard to your Joint Cement Plant problems, it seems imperative that we get together soon to discuss all the angles. We did not intend to force Earl Harvey's opinions upon anyone in your organization but were attempting to provide you with enough information and suggestions to make a decision possible.

We still would like to see the Bag Packer System installed as it was planned pending further decisions on the Bag Slitting Hood.

In the meantime, however, we will abide by your wishes to wait for the test results and have a hold put on the ordered equipment.

Trusting these drawings meet with your approval, we remain,

Yours very truly,

H. J. OTTEN CO., INC.
