Southern Alkali Corporation
5th Avenue at Bellefield
Pittsburgh 13, Pennsylvania

Attention: Mr. E. T. Asplundh, Vice-President

Gentlemen:

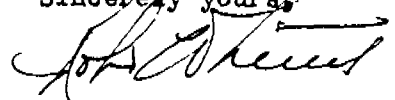

By a letter dated October 30, 1947 this Administration authorized your company, subject to certain specified qualifications, to enter into a three way contractual arrangement for the sale of power between Southern, Cities Service and Gulf States Utilities.

In view of the present discussions between Mr. Asplundh and Mr. Cort of your Company and representatives of the Administration, this letter of authorization dated October 30, 1947 is amended to include an additional qualification with respect to the rates and charges for additional power.

Specific reference is made to your letter of September 4, 1947 in which you set forth certain terms and conditions under which this contractual arrangement will be carried out. On page 3 of that letter, paragraph #3, "Rates and Charges", there should be inserted the provision that all additional power shall be "at the rate of fifty cents (\$.50) per kw per month of highest demand scheduled in any monthly billing period if and when the sum of the charges at the daily rate of five cents (\$.05) per kw would exceed the charge at the monthly rate of fifty (\$.50) per kw".

Other than the above additional qualification, the authorization granted by letter of October 30, 1947 will remain in full force and effect until such time as a definitive agreement is consummated.

Sincerely yours,

ROBERT WHITTIER

Associate Deputy Administrator
