Subject: CNG Fuel System Inspector Training - Big Rapids, MI

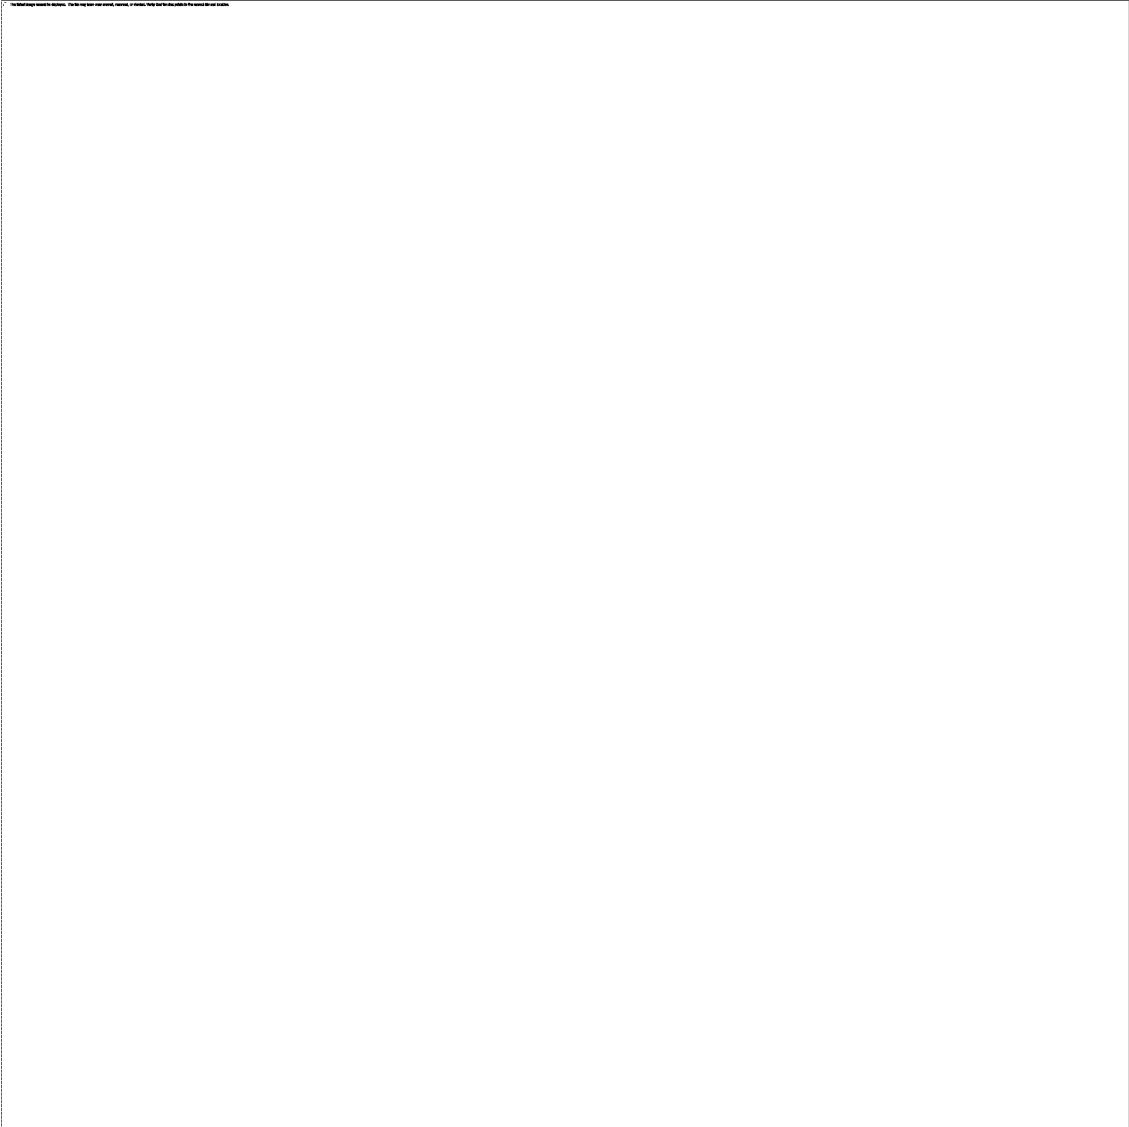

**August 15-16
Ferris State University
Big Rapids, MI**

Register Now

Why consider NAFTC CNG Fuel System Inspector training?

- **Today there are more than 2.5 million natural gas vehicles in use.** Their CNG cylinders and components require inspection every 3 years/36,000 miles.
- **The National Alternative Fuels Training Consortium training program will give you a complete understanding of CNG fuel system inspection.** You will gain a thorough knowledge of all required inspections, tests, apparatus, and inspection procedures.
- **This course along with study will help prepare you to pass the CNG fuel system inspector certification exam.** You can become certified CNG Fuel System Inspector by passing the CSA International standardized certification test for cylinder inspection.
