INSULATION COATING
WHITE
CODE NO. 30-70

A tough, flexible, fire-retardant protective coating for thermal insulation and for cementing canvas lagging on insulated piping and equipment.

DIRECTIONS FOR USE Keep from freezing. Stir thoroughly and apply by brush, spray, or roller. Use without thinning for best results. In two coat applications, first coat may be thinned with 1 gallon of water to 5 gallons of Lagtone. Do not apply when air or surface temperature is below 40° F.

CONTENTS FIVE U. S. GALLONS

Foster products are designed to meet the needs of highly specialized coating, sealing and adhesive situations. They are fully guaranteed to do the work for which they are intended. We make no claim for Foster products except our guarantee of their effectiveness for those specified uses. The methods and conditions of application upon which we can exercise no control, are important factors in the performance of our products. We make detailed recommendations upon the application and use of all Foster products, and we regard neither our recommendations nor the users. Therefore, it is necessary that we make as a condition of sale of our products that we will gladly refund the purchase price of any Foster product found by our labor to be defective in any way, but that we assume no responsibility beyond the purchase price of our material. No representation of our company has authority to change or extend this condition of sale.
