

## Interoffice Communication

To : R. D. Gamblin  
From : Frank Willson  
Date : December 18, 1974  
Subject : VCM Compliance Program

Item II A, 1

Our original plan specified the entire plant as a regulated area. We will determine if some areas can be considered non regulated by including them in the gas bag sampling program.

Any areas found consistently below the permissible limit will be specified non regulated. Non regulated areas will be sampled monthly to see if they remain below the permissible limit.

Frank Willson
