Per our discussion on the suggestion to add a statement to our Pydraul labels indicating the products are toxic to fish and to keep them away from food animal feedstuffs and pharmaceuticals, I suggest the following:

"This product is toxic to fish. Prevent entry into the aquatic environment through spills, leakage or disposal. This product should not contact or in any way contaminate food, animal feed, food products, food packaging materials, pharmaceuticals or any items which may directly or indirectly be ultimately ingested."

Any suggestions you may have are most welcome.
