Reduction to Support Budget
Reductions

- Outstanding Government &
Industry Speakers -

- Please Forward to Others in Your
Organization

- New and Experienced
CyberSecurity Executives, Managers
and Staff

Hear from industry experts and government officials tasked with implementing robust cybersecurity and risk management strategies along with learning how NIST's CSF and RMF can be effectively implemented to reduce the risk of cyber-attacks.

Listen to a government panel of CIO, CISO and othersto understand the challenges they are facing on a day-to-day basis and how implementation of NIST's CSF and RMF helps them identify the risks and what it takes to mitigate those risks. Gaining insights from the panel and peer interactions at the workshop should be invaluable in moving the needle forward to improve federal cybersecurity.

Who Should Attend:

- CIOs, CISOs, and Staff
- IT security and risk management practitioners
- IGs and Staff
- Senior Accountable Officials for Risk Management and Enterprise Risk Managers
- Program Managers responsible for risk management
- Government Executives, Managers and Staff who want to better understand how the Cybersecurity Executive Order is being implemented
- Industry and Contractors who want to better understand how the Cybersecurity Executive Order is being implemented
- All government and industry members who want to better understand how the Cybersecurity Executive Order is being implemented to help improve Agency Cyber Security

Why You Should Attend:

- Gain a better understanding of the May 11th Presidential Executive Order on Cybersecurity and how it is being implemented
- Obtain practical knowledge of lessons learned from government leaders who are involved in implementing the Cybersecurity Executive Order

- Collect information on how NIST frameworks can be leveraged to enhance the security of your organization
- Learn how risk management and cybersecurity are essential for regulatory compliance
- Meet with risk management, cybersecurity, and CIO colleagues

A "How to" Workshop Discussing Best Practices and Lessons Learned

Wednesday, November 15, 2017

Willard InterContinental Hotel

Washington, D.C.

Link to Potomac Forum Website: www.PotomacForum.org

Government & Industry Invited to Attend

Sponsored by:

Potomac Forum, Ltd

providing training to government since 1982

**Potomac Forum Workshops are 100% Training and
Not Sales or Marketing Events**

Overview:

This workshop will focus on the progress to date in implementing the President's EO on Cybersecurity with emphasis on key requirement: identification of High Value Assets, implementation of NIST's Risk Management Framework (RMF) and Cybersecurity Framework (CSF). The CSF and RMF are critical for the federal government in its efforts to mitigate risk within enterprise information systems. The workshop will also discuss the relationship of the RMF and CSF to NIST SP 800-53 r5.

What You Will Learn:

- The value of the integration of the NIST RMF, NIST CSF and their relationship to NIST SP 800-53 r5
- Lessons learned from agency risk management and high value asset reporting
- Dos and don'ts for agencies in implementing the Cybersecurity Executive Order
- Best practices for responding to the Cybersecurity Executive Order
- Next steps for agencies in implementing cybersecurity best practices
