

March 27, 1967

Mr. Victor H. Sussman
Director, Division of Air Pollution Control
Pennsylvania Air Pollution Commission
P. O. Box 90
Harrisburg, Pennsylvania 17120

Dear Mr. Sussman:

I realized last week before the long holiday that I had not proposed any language as previously promised on the auto emission problem. Remembering your comments relative to avoiding the involvement of auto emissions in your proposed criteria, I would like to suggest the following addition to the footnote under Section 11 B:

"In general, the criteria are based on a dosage concept and require both the presence of a receptor and an exposure time equal to or greater than those listed."

This language should prevent some future misapplication of lead criteria to automobile emissions and I trust that it will be consistent with your disinclination to involve the proposed criteria with this subject at this time.

Very truly yours,

Charles E. Welch
