Attachments: OECD PFC group meeting 20230123.docx
Categories: #DONE

Dear CCIM PFAS WG members,

I would like to inform you on a OECD PFAS working group meeting that I participated to yesterday. This is a meeting that is organized a few times a year to inform on OECD related actions regarding PFAS and to exchange between members. In the annex you can find some quick notes and screenshots. Below some quick points and takeaways of this meeting:

- Several **OECD reports** on PFAS are in the pipeline, mainly on: Perfluoropolyethers, fluoropolymers, and the use of PFAS in cosmetics, and in oils and lubricants.
 - o It is still possible to propose other subjects, so please don't hesitate to send in any requests on topics you believe are interesting for the OECD to investigate.
- The OECD is planning on organizing a **PFAS Forum event in 2024**
 - o Will be organized either the week of February 13th, May or September 25th 2024
 - o Also for this it is possible to suggest topics to be discussed during that Forum.

Regarding the point on the PFAS Forum it is interesting to add that some members have indicated they would like to see some case studies on PFAS regulatory actions. Considering this and the proposed timing of 2024 it might be interesting to see whether the proposal of VL on a PFAS event during the presidency could be integrated here in some way?

Please don't hesitate to send any feedback on these points (either some proposals for report topics or topics for the PFAS Forum) to me so I can relay them to the OECD PFAS group secretariat.

Kind regards,

██████████ ██████████
