

ERIE LAKE PLANT
REVISED ASBESTOS SURVEY NO. 1

Asbestos levels at the Erie Lake plant were surveyed on March 3, 1972. The samples were evaluated by the USPHS-developed procedure. The results are summarized here:

<u>Sample No.</u>	<u>Area</u>	<u>Fiber/cc</u>
A-1	Roofing Mill Saturator	1.2
C-1	Paint Dept. - Mixer	7.6
C-2	Paint Dept. - Area	1.8

The level measured during asbestos charging in the Paint Department exceeds the 5 fiber/cc OSHA limit.

Revision Date March 22, 1972
