KALGOORLIE

19th January, 1954.

State Mining Engineer,
Mines Department,
PERTH.

Proposed visit to Wittenoom Gorge.

All previous visits to the Asbestos mine at Wittenoom Gorge have been made during the winter season when climatic conditions there are ideal. In order to ascertain true ventilation conditions in the mine, I consider a visit should be made in the summer season when surface conditions are unpleasant.

In regard to this I propose with your approval, making a visit during February and submit the following itinerary.

Depart Perth Tuesday 9th February.

Arrive Wittenoom. Tuesday 9th February.

Depart Wittenoom Saturday 13th February

Arrive Perth Saturday 13th February.

If these arrangements are satisfactory to you, will you please have the necessary bookings made.

J. M. F.

DISTRICT INSPECTOR OF MINES.
