Subject: Stacks & Emissions for Current and 2003 Modeling

Debbie / Bob,

Please see the attached sheet named Stacks & Surfactant Emissions-12c.zip for 2001, 2002, and 2003 emission estimates.

The sheet Stack Emission Projection 20020905.zip contains the production data, QPU, and scrubber efficiency estimates I used to get the emissions. The sheets are zipped with our favorite password.

Please advise Rob Pinchot, Bob Ritchey, and me when you have completed the runs.

NOTE that the stack parameters for T6IFZE are different than those you have seen before.

NOTE also that I worked with Karl to get the emission estimates for the copoly sources, but that I will also check with Ta-Wei to confirm the guesses at their efficiencies for 2001 & 2002.

Call me at 304-864-4130 if you have any questions.

Thanks,
Chris Shoop
