

1 Q To humans.

2 A I have not done a recent literature search, no.

3 Q When was the last time you did any literature search on
4 that issue?

5 A It's probably been more than 10 years.

6 Q Do you recall the last article or any article you've
7 read on the possible adverse health effects from
8 environmental exposure to PCBs in humans?

9 A No. I don't recall the last article I read, no.

10 Q Can you recall any article you have read on that
11 subject?

12 A I can't specifically. There have been many. There are
13 two camps. There are those scientists who believe PCBs
14 are harmful to humans. There are those scientists who
15 believe they are not. And they have had evidence on
16 both sides. Some of the evidence is good evidence.
17 Some of the evidence is not good evidence.

18 But I don't recall the last time I read an article
19 on this issue.

20 Q Do you personally believe that environmental exposures
21 to PCBs and the way we have been describing them,
22 discussing them, cause physical illness or injury other
23 than psychological injury?
