Subject: Pediatric Lead Poisoning Symposium - American Academy of Pediatrics

I have just had a conversation with Marty Dille of the American Academy of Pediatrics. He has informed me that the two symposia to be sponsored by the Academy will be held in Chicago on May 10th and 11th at the Conrad Hilton Hotel and also on June 2nd and 3rd at the Wilmington Academy of Medicine, Wilmington, Delaware. While the majority of speakers at the two day and a-half sessions will be repeats, there will be a certain number of speakers drawn from the local areas. LIA, therefore, will have to plan to cover both symposia, and to record the questions and answers at each of the sessions. All of the speakers, including the local participants, have been asked to prepare their papers for publication.

It will probably be necessary for LIA to run a tape recorder and have a stenographer available for both sessions. Perhaps Hill and Knowlton could supply us with the equipment and a stenographer for the Chicago session. We may be able to handle the Wilmington session with our own staff.

I will be meeting with Mr. Dale and Dr. Edward McCabe of HEW-BCDM in Chicago on Saturday, March 25th to go over the agenda and to make final plans and preparations.
