

A Dutch Boy solder for every soldering job

THERE is a Dutch Boy bar or ingot solder for every soldering job. Dutch Boy solders are numbered from 111 to 888 to designate a fixed composition. Dutch Boy 111 is a real "half and half" (50% tin and 50% lead)—the acme of solder quality. Joints made with this solder "hold"; last as long as the metals themselves.

Dutch Boy wire solders are famous. They come with and without a flux core—either acid or rosin. The flux-core solder is excellent for radio and electrical work.

CORROSION DECAY Thwart Their Attack with Lead Paint

ON exterior wood-
work, an all-lead
paint made of pure
white-lead and linseed
oil affords thoro protec-
tion against decay.
Dutch Boy white-lead
is pure white-lead. It
forms a tough, elastic
coating that will not
crack or scale. And on
interior surfaces Dutch
Boy white-lead, mixed
with Dutch Boy flatting
oil, produces a glossless
finish which is washable.
Pure red-lead paint
provides sure protection
against metal corrosion.
Paint composed of Dutch
Boy red-lead and linseed
oil completely guards
against rust—the com-
mon enemy of gutters,
drain pipes, ornamental
iron work, etc.
Dutch Boy white-lead
and Dutch Boy red-lead
are standard among
professional painters.

protector of wood and metal

WHITE-LEAD. mixed with pure linseed oil, prevents deterioration. It protects exterior surfaces against moisture and covers them with a tough, durable coating that does not crack or scale.

When mixed with flatting oil, white-lead gives a beautiful, glossless finish for interior walls and woodwork. This paint is absolutely washable and, like white-lead paint for exterior use, offers an unlimited color range, as it is tinted to order.

Red-lead is the paint for metal surfaces. It is the one acknowledged protection against that destroyer of iron and steel—rust. Fences, gutters, drain pipes and ornamental iron work last longer and look better when treated with a film of red-lead paint.

See that you get Dutch Boy white-lead and Dutch Boy red-lead. Because of their durability, beauty and economy, paints made of Dutch Boy paint materials are a lasting boon to the builder and owner.

Lasts Long —stays beautiful

DUTCH BOY white-lead is the choice of professional painters. These painters use their most ambitious jobs the all-lead paint it makes.

Dutch Boy white-lead is pure white-lead. Mixed with linseed oil, it forms a tough, elastic coating which protects exterior wood-work against deter-

ioration. On interior surfaces Dutch Boy white-lead and Dutch Boy flatting oil produce a handsome, glossless finish which washings will not mar.

Whether you are building or redecorating, use lead paint made with Dutch Boy white-lead. It insures long-lasting protection at low cost per year.
