ASBESTOS OPERATING PERMIT STANDARD CONDITIONS

1. The granting of this permit by the Agency does not release the permittee from compliance with other applicable statutes of the State of Illinois or applicable local laws, regulations, and ordinances.

2. The Agency has granted this permit in reliance upon all information submitted in the referenced application, and such information is incorporated herein by reference. If any statement or representation in such application is found to be incorrect, this permit shall become immediately void, whereupon the permittee shall immediately waive all rights thereunder.

3. There shall be no deviation from the approved plans and specifications unless additional or revised plans are submitted to the Environmental Protection Agency and a supplemental written permit issued.

4. At any time any agent of the Environmental Protection Agency shall have the right and authority to inspect the equipment and operation for which this permit is issued. This authority:

   (a) shall not in any manner affect the title to the premises upon which the equipment is to be located;

   (b) does not release the permittee from any liability for any loss due to damage to persons or property caused by, resulting from or arising out of the design installation, maintenance or operation of the equipment;

   (c) in no manner implies or suggests that the Agency or its officers, agents or employees, assumes any liability, directly or indirectly, for any loss due to damage to persons or property caused by, resulting from or arising out of the design installation, maintenance, or operation of the proposed equipment.

5. This permit is subject to review and change by the Environmental Protection Agency as deemed necessary to fulfill the intent and purpose of the Environmental Protection Act and Regulations thereunder promulgated and as stated in Rule 621 of Part VI, "Asbestos".

6. The permittee shall continue to designate personnel who shall exercise full-time supervisory authority and take action necessary to insure compliance with pertinent Asbestos Regulations. A current list of such designated personnel shall be filed with the Agency.

7. Each employee of the permittee who is engaged in any activity which may release asbestos fiber into the environment shall complete a course of instruction on the potential hazards of exposure to asbestos fibers, including precautions that must be observed to prevent or restrict the release of asbestos fiber into the environment. The permittee shall notify the Agency of the name of every employee who has completed such course immediately upon the completion thereof.

8. The equipment shall be constructed in such a manner that operation or disposal of air contaminants will not cause a violation of the Environmental Protection Act or of applicable regulations.
