Ambler, Penna 19002

Attention: Mr. H.B. Davis

Dear Hal:

Mr. Workman's letter of 8/7/72 offers your Company's assistance in measuring asbestos dust levels in certain customer factory areas, for compliance with OSHA standard level of (5) fibers per cc. of air.

We are anxious to determine whether we exceed this standard in the dry felt unwind stand and accumulator areas when running asbestos felt on our #2 Machine.

Would you please advise the estimated cost for this service and what lead time would be required to set up the test?

Thanks in advance for your help.

Yours very truly,

C.R. Dickinson
Plant Sup't.
