Subject: RE: Annotated agenda for NEM 26/9- 27/9

Sorry,

To save time I have uploaded 6 documents as a zip document. So you should first download the zip, and then open!

I note that because of some confusion between myself and Arno, the two Finnish documents are there now two times.

Later today we will still upload a note on the topics related with industrial emissions.

Best

Subject: Sv: Annotated agenda for NEM 26/9- 27/9

Dear ,

Thanks for the info. We can download the annotated agenda from Circabc, but not the other documents you are referring to, CRP PFAS etc.

Please, guidance.

Have a nice weekend and see you next week,

Dear,

Please note that we just uploaded on behalf of the Presidency and the Commission and annotated agenda for the NEM of next week in CIRCABC.

In the same folder you find other documents of relevance for the NEM meeting which were prepared and to which we in principle refer to in the annotated agenda. This includes two inputs from Finland regarding the CRP on Solar Radiation Management and a possible new CRP on the PFAS issue. It also included as requested and input from DE commenting on several issues of the agenda.

Looking forward to see you next week and discuss.

Kind regards,

Head of Unit C1
