ALEX. STEWART
DIRECTOR OF RESEARCH

April 4, 1947.

Dr. Robert A. Kehoe,
Kettering Laboratory of Applied Physiology,
College of Medicine,
University of Cincinnati,
Eden Avenue,
Cincinnati 19, Ohio.

Dear Dr. Kehoe:

I have your letter of March 28 regarding the industrial problem in our Magnus Metal plant in Cincinnati and I want to say we sincerely appreciate your drawing this matter to our attention. I have taken the liberty of discussing your letter and report with our Executive Vice President and he is considerably concerned.

Next week I am sending two men to Cincinnati to thoroughly examine the hygienic conditions in these plants and as promptly as possible will arrange to get together with you and discuss the results.

I am pleased to know that through our mutual friend, Mr. John Schaefer of Ethyl Corporation, you were able to bring this important matter to our attention. I should like to personally assure you it will be given our fullest attention.

Yours very truly,

Alex. Stewart
