Hi Alan,

EPA Region 8 will host a series of forums to interact and dialogue with industry reps and stakeholder groups representing key sectors of the economy in the states of CO, MT, ND, SD, UT, and WY. These forums will resemble the oil and gas round table held in Denver in February.

Forum goals include fostering a better understanding among EPA personnel of industry business models and best practices in environmental protection, and providing an opportunity for industry participants to learn about EPA's regulatory processes.

Region 8 Smart Sectors is partnering with trade associations and industries that represent the engine of the Region's economy and provide significant opportunities for environmental impact. Additional sectors may be added over time.

Region 8 Special Emphasis Sectors Include:

- Agriculture and food/beverage production
- Mining
- Outdoor Recreation/Tourism

May I please ask three things from you:

1. Name of the staff in your office with whom we should coordinate your organization's participation in these events.
2. Name of the staff in the Governor's office with whom we should coordinate Governor's office participation in these events.
3. Your suggestions for participants at these events

Sincerely,

Patrick Davis
