AT THE Alameda Naval Air Station, an unnamed naval air group has reported in for leave, with a record of more than 7,000 combat hours, 2,000 different sorties, more than fifty missions per fighter pilot and more than thirty per torpedo and dive-bomber pilot, the Twelfth Naval District reported.

The group flew with marine pilots from air strips at Bougainville, and some of its planes shared in one of the most successful strikes against Rabaul, when nine Japanese vessels were sunk or destroyed. Its fighters have nineteen planes and seven "probables" to their credit.

HOUSE PAINT
the paint that cleans itself

Starts white—stays white

Why is Du Pont House Paint so brilliantly white? Because it's made with titanium dioxide, the pigment that's even whiter than snow! This paint stays white, too, because—

It's self-cleaning

Du Pont House Paint is so formulated that, as time goes by, a microscopically fine white powder forms on the surface. Heavy rains wash this powder away, taking dust and dirt with it, and leaving the surface clean and white again. (Excessive accumulations of dirt, particularly in sooty industrial communities, or in heavily shaded locations, may delay or interfere with this process.) Because this "self-cleaning" is gradual, the wearing qualities of the paint film are not abnormally affected.

Guards the surface

Forms a beautiful, durable coating that protects against rust, rot and decay. Available in white and popular tints. When you paint your house, use the paint that gives it both lasting beauty and protection.

Yet this Du Pont Self-Cleaning House Paint costs no more than other good paints. Call in a reliable painting contractor. He'll be glad to use Du Pont House Paint.
