This is to acknowledge the receipt of your letter of February 13, and to assure you that the questions that you raise are being looked after. Some of this must be done by correspondence, of course, which delays things considerably. Professor Flockett is to serve as chairman of the committee to raise funds, I am, therefore, sending him a copy of your letter to me.

First: The minimum amount of expenditure which would be required per annum. I will write to you again as soon as I have any information. I might say, however, that the \$20,000 was the sum that our research committee thought should be raised annually. This should not be impossible, if everything else is favorable, and if all interested organizations are properly lined up. - primary interest to contribute through their legislation towards the cost of the experiments. Yours very truly,

Fourth recommendations have been made that, in line with the thought which you gave to me, W. C. Ruth be given an opportunity to cooperate in order that they will recognize the results. Several industrial companies have reported that on previous work Chief in Toxicological it was not recognized by the Physiology Department.

cc: ~~Committee~~ to have your further comments on the above.

Mr. W. A. Ruth
Chief in Pomological Physiology
University of Illinois
Urbana, Illinois

Dear Mr. Ruth:

I am enclosing herewith copies of letter which I sent to Mr. E. S. Pickett and Mr. T. J. Talbert of the University of Missouri.

As I see the problem now, there are several important things to determine.

First; the minimum financial expenditures which would be required per annum for three years.

Second; develop a list of allied groups who will cooperate in supporting the work,

Third; develop some means for the growers who have a primary interest to contribute through their Association towards the cost of the experiments,

Fourth; recommendations have been made that, in line with the thought which you gave to me, the Federal government be given an opportunity to cooperate in order that they will recognize the results. Several industrial companies have reported that on previous work of this kind, after it was done, it was not recognized by the Federal government.

I would be glad to have your further comments on the above.

Yours very truly
