

Detroit White Lead Works'

CHAMPION

READY MIXED PAINTS,

Are a mixture of White Lead and Zinc and are guaranteed to outwear pure White Lead as ordinarily used.

They are put up in 1-4, 1-2 and 1 gallon Tin Pails; also, 5 gal. Buckets and Barrels.

We make all the tints on this Card, as well as, Inside and Outside White, Black, Window Blind Green and Vermilion.

One gallon of these Paints will cover 225 to 350 square feet of ordinary surface, two coats. To find how many gallons of paint is required for a Building, find the number of square feet of surface to be painted, which, divided by 225, gives the number of gallons.

Attention should be paid to having the surface clean and dry and all pitchy or knotty places should be shellacked before painting. The first coat should be well brushed on and thoroughly hardened before a second is applied. If the Paint should be too thick, thin with Linseed Oil for Outside Work, and if it does not work freely add a little Turpentine. For Inside Work thin with Turpentine only. One trial will convince the most skeptical of the superiority of these paints.
