Dear [REDACTED]

thanks a lot. I will see if I can use it tomorrow.

Dear [REDACTED]

Here the very last version of the SC-PFAS strategy paper, presented to CARACAL in the summer 2018. It was after that commented by UK, but not anymore worked on.

The paper is a product of the PFAS WG, so at least [REDACTED] [REDACTED] and some UBA, SE, AT and NL colleagues have contributed to it. In particular the effects -part is a result of the tox -colleagues, we from ECHA side did not really touch that part in the finalisation stage.

Let's see whether this helps...

Dear [REDACTED]

you mentioned in our last joined meeting a paper, which might be usefull for elaborating on combined effects of PFASs. Would it be possible to send it to me?

Thank you,
