

July 6, 1933

Lead poisoning.

\$15.71

T.T. July 28, 1933 to Nov. 2, 1933 - - - - - \$146.58

QUESTION:

Further compensation.

- - - - -

A review of this file shows that the claimant was employed by the above concern as a laborer in July of 1933, when he contracted lead poisoning, which necessitated total disability over the period set forth in the caption.

As to his condition subsequent to that date, special examination conducted by Dr. Hudson, on May 3rd, 1934, show that the claimant, now thirtyeight years of age still complains of not feeling well, of having been sick ever since the original disability, of having spells of pain in stomach and bowels and of being very weak. Examination disclosed that the claimant was well nourished and developed, neurological examination essentially negative - there was no definite wrist or foot drop or evidence of residual paralysis. Complained of tenderness to palpation over the abdomen. Commenting on the case, Dr. Hudson states that the majority of the symptoms have subsided at the present time with the exception of tenderness over the abdomen and subjective symptoms of lead colic; that this could be due to other causes, but from the history, claimant apparently suffered from lead poisoning

NO. 0.1.10562.

- 2 -

and possibly same was connected with his original disability. However, in his opinion the claimant is ready for light work and disability at the present time does not exceed a moderate partial degree.

CONCLUSION:

It is concluded that the proof herein is sufficient to show that the major portion of claimant's symptoms at this time are subjective in nature; that he may have a partial disability of moderate degree which will continue for some time to come; that the claimant, according to his own statements is still unemployed and unable to be employed.

RECOMMENDATION:

That temporary partial compensation on an impairment of \$3.00 be awarded from date of last payment to August 1st, 1934; that claimant be advised that compensation beyond that date will depend upon him securing suitable employment and filing wage statements showing a definite impairment in his earnings by reason of the original disability.

May 3, 1934.

May 3, 1934.

Age - 38

Date of injury - 7-6-33

Nature of injury - "lead colic."

COMPLAINT

States he does not feel very good. Has been sick ever since he had lead colic. Says he had a spell last Friday night, pain in the stomach and bowels. Is very weak. Not working.

EXAMINATION

Well nourished and developed colored man. Neurological examination essentially negative. There is no definite wrist or foot drop or evidence of residual paralysis, on this examination. Complaints of tenderness to palpation over the abdomen.

COMMENT

The examiner is unable to state if this claimant suffered from lead poisoning as the majority of the symptoms have subsided at the present time with the exception of tenderness over the abdomen and subjective symptoms of lead colic. However this could be due to other causes. From history of the case however claimant apparently suffered from lead poisoning. However claimant is ready for light work as disability at the present time does not exceed a moderate partial degree.

RECOMMEND

Temporary partial of moderate degree for four months, with re-examination.

Claim No. OD 10562

NAME

ADDRESS 952 Court St.,
Cincinnati, O.

Dear Doctor:-

We are referring the above claimant to you for examination,
report and opinion as to whether or not claimant is suffering
from lead poisoning, and if so, if it is of such severity as to
cause an impairment of his earning capacity.
You may notify the claimant at the address given above when to
appear at your office for this purpose.

We are enclosing, herewith copy of Statement of Facts
copy of med. examination.

which will give you a history of the case, as shown by our files.
Kindly send your report in TRIPPLICATE, together with your fee bill,
direct to the Medical Section, as soon as possible. The extra
form enclosed is for your files.

In preparing your report, please use the following subheadings
in the order given:-

- (1.) HISTORY—of injury and treatment, past medical history, previous injuries, family history (if applicable).
- (2.) PATIENTS COMPLAINTS—describe in detail even if they have no apparent connection with the injury.
- (3.) EXAMINATION—include all objective findings, clinical, laboratory and X-ray.
- (4.) DISCUSSION—summary and treatment indicated.
- (5.) OPINION—extent of disability (total or partial). If total how soon will he be able to work. If partial, estimate degree on percentage basis if possible.

Use the Form (C-111) enclosed and continue your report on the reverse if necessary.

Very truly yours

H. H. DORR, M. D.,
Chief Medical Examiner.
