Enclosed you will find correspondence on the subject. Unfortunately, I have not received any comment yet from O. W. Pfeifer. In view of the recent letter from Mr. Briley, I think this subject ought to be brought to his attention. The situation with asbestosis, the death that has occurred and the illnesses that exist should also be brought to his attention.

I need some answers from those written to and copied to help me make some inroads at Bath. But I don't want to get involved in discussions of this type where health hazards are concerned unless I have checked with others.
