

DR. GEORGE PAGET

Transcript of April 9, 1985:

"Q Well, you held a meeting later in June where you discussed the position that you all were going to take. You gave that to your Senior Vice President, Mr. Throdahl, didn't you, sir?

"A That was a paper to discuss the establishment of an ultra-trace laboratory, sir.

"Q You also discussed the very small amounts of TCDD in the human environment of certain circumstances of intimate exposure may have significance, didn't you, Doctor?

"A Yes, sir." (p. 100)

"Q You are talking about Santophen that goes out and gets into Lysol, and you are talking about 2,4 D that goes out and gets in Weed-B-Gon, and you are talking about orthochlorophenol that goes out, and others make it into pentachlorophenol for a wood preservative, and you are talking about parachlorophenol and 2,4 D that may be used in oil well drilling, and things of that sort, is that correct, sir?

"A Yes, sir." (p. 103)
