

Ready for **BRUSH** in a few minutes!

YOU can mix pure lead paint in a jiffy . . .
with Dutch Boy *soft paste* white-lead.

This pure white-lead comes in the form of
"shop lead" . . . already broken up with enough
linseed oil to be an easy-to-thin paste.

A "hundred" of *soft paste* can actually be thinned
to brushing consistency at the rate of a gallon of
paint a minute. It's easy to tint, too. And the
resulting paint spreads with surprising ease and
smoothness.

Dutch Boy *soft paste* white-lead comes in 100
lb. steel kegs; 50, 25, and 12½ lb. steel pails.
Our Dutch Boy trademark on each package
guarantees the contents to be pure white-lead
and pure linseed oil—*nothing else*.
