subject ASBESTOS

cc: R. C. Mercer - Granville

Dear Dick:

We have received an inquiry from Japan on the subject of asbestos being banned in the U.S.A. and the United Kingdom.

The information they have learned is that it has been banned due to being detrimental (their wording) to the human body. Also they would like a copy of the regulations governing this banning. Finally, Dick, they would appreciate knowing how OCFC is attacking this problem and have we replaced asbestos in our product.

We would appreciate any information you can forward to us for transmittal to Japan. All costs incurred in answering this request are to be charged to V71-8709-4PE.

Kindest regards,

C. B. WARDEN
